Availability of Trademark Status Line

Beginning on Feb. 20, 1990, the U. S. Patent and Trademark Office provided access, via push button telephone, to current status and status date information for all federal trademark application and registration records maintained in the automated Trademark Reporting and Monitoring (TRAM) System. The Trademark Status Line will be available on (703) 557-8747 from 6:30 a. m. until midnight, Eastern Time, Monday through Friday.

The Trademark Status Line may be used from any push button telephone by entering a seven-digit registration number and the "#" symbol or an eight-digit serial number and the "#" symbol after the welcoming message and the tone. All calls will be answered in the order received. Callers may request information for up to five serial number or registration number records per call.

When requesting information for registration numbers under one million, add sufficient leading zeros to the registration number so that a total of seven digits are entered. For example, to get status information for Reg. No. 88,725 enter 0088725#.

When requesting information for applications, enter an eight-digit serial number that consists of the two-digit series code followed by the six-digit serial number PTO. The series code is determined by the filing date of the application. All applications filed before Mar. 31, 1905 are series code 70. Applications filed between Apr. 1, 1905 and Dec. 31, 1955 are series code 71. Applications filed between Jan. 1, 1956 and Aug. 31, 1973 are series code 72. Applications filed between Sept. 1, 1973 and Nov. 15, 1989 are series code 73. All applications filed on or after November 16, 1989 are series code 74.

When requesting information for serial numbers under 100,000 in any series code, add sufficient leading zeros to the serial number so that a total of six digits are entered after the series code. For example, to get status information for serial number 92,132 in series code 73, enter 73092132#.

The TRAM System contains records for all active federal trademark registrations and pending applications. The TRAM System also contains records for all federal trademark registrations and applications which became inactive after Mar. 31, 1982. Some earlier inactive records are also available.

The Trademark Status Line will provide current status information for all federal trademark application and registration records included in the TRAM System. The date that the record entered the current status is provided also. If additional information regarding the status of a trademark application or registration is required, call the Trademark Services division at (703) 557-5249 and request a status check.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
